Adobe Acrobat Sign

Adobe ✕ Microsoft

Adobe Acrobat Sign for Microsoft Teams

Maximize efficiency while empowering your teams to collaborate—no matter where they are.

Adobe Acrobat Sign is an intuitive e-signature solution that lets you quickly create, send for signature, track, and store documents—without leaving Teams.

Streamline document approval workflows with Acrobat Sign.

Experience 100% paperless processes and automated workflows with Acrobat Sign, the only Microsoft preferred e-signature solution. Quickly and securely send documents and digital forms for e-signature and approval directly from the Acrobat Sign tab in Microsoft Teams. Efficiently send documents like purchase orders, vendor forms, and other contracts, and get them signed and returned in just a few clicks—from anywhere, on mobile or desktop.

Receive notifications and take actions directly from the Teams Activity stream when documents require signing or have been signed. Check which documents are out for signature, signed, or waiting for signature using the Home tab or Acrobat Sign bot. Help your team stay on track by sending reminders to prompt others to sign or approve. Access a legally binding audit trail for any transaction without leaving Teams. And all documents are tracked and securely stored in Teams—so they're always available anytime, anywhere.

Initiate and track e-signatures all within Microsoft Teams Approvals.

Getting things approved is part of almost every workflow. And because more than 100 million users collaborate with co-workers, suppliers, and customers in Microsoft Teams, it makes perfect sense to enable Acrobat Sign e-signature workflows right inside the Teams Approvals interface.

Start an approval flow with an e-signature from the same place you send a chat, in a channel conversation, or from the Approvals app itself. It's that easy! And Acrobat Sign e-signature status is integrated into the Approvals tracking page—so you can visit one location to get real-time updates on all your approval workflows in progress.

Add Live Sign with Acrobat Sign to any Teams meeting (coming soon).

Most e-signature solutions deliver documents via email or a web link, with little instruction or description. But some documents are more complex and vital than others and require a live conversation to ensure the signer feels comfortable. Other documents may legally require a live signing experience. Live Sign in Acrobat Sign for Teams revolutionizes the signing experience for both senders and recipients by making secure face-to-face signing a reality without the need for anyone to travel.

Senders can walk recipients through any document or agreement during a Teams video meeting. They can explain each page, answer questions, check for understanding, and even read natural visual clues in real time. And recipients can then sign the document live during the Teams meeting with legally binding e-signatures.

A platform that provides trust, security, and compliance.

As a trusted leader in digital documents, Adobe delivers 100% digital experiences in the cloud, from a flexible, global SaaS platform that helps customers reduce security risk and meet their compliance requirements. Acrobat Sign is certified compliant with rigorous industry and regulatory standards, including SOC 2 Type 2, ISO 27001, and FedRAMP Moderate. Acrobat Sign Solutions is PCI DSS certified for the Payment Card Industry and can be configured to support compliance with HIPAA and FDA 21 CFR Part 11. Acrobat Sign can also be configured to support compliance with industry-specific regulatory requirements, such as FERPA and GLBA. For the current list of Adobe certifications, standards, and regulations,

- Document retention
- Audit sign-off
- Live signing of documents

"Acrobat Sign is the new linchpin of our digital workflow. With its strong integrations with existing Microsoft tools and processes, we're maximizing investments and seeing returns very quickly. We are strong users of collaboration tools like SharePoint, so with the new capabilities with Teams and Power Automate—as they integrate with Acrobat Sign—it makes natural sense for us to use these tools to improve our collaboration across the organization."

Dave Thalacker

Former Senior Director of IT Operations and Network Security
